Company profile

High experienced and special educated architects and designing team, ensure high quality modular operation theater products and services at each stage of the project, from design to construction. Our supervisors are multi lingual engineers, whose goal is to provide the best solution and know-ledge for the customer. Our staff is trained and specialized in applying all the above materials and operating theater products in projects all over India as well as abroad.

**The operating theatre has always been a unique place designed for saving lives.
The more it evolves, the more lives can be saved.**

Modular OT Features

- ➔ Design as per NABH norms
- ➔ Class 100 to 10000
- ➔ HVAC design 20,10,3 and 0.3 micron filtration
- ➔ Ss /aluminum LAF hepa bad
- ➔ Surgeon control ELE panel
- ➔ Clean room puff partition wall / ceiling
- ➔ SS puff partition

- GI powder coated puff partition
- Epoxy / PU flooring
- View panel & pass box

Range of activities:

- Construction of hospital areas such as: modular operating theaters, ICUs, nursing chambers, diagnostic rooms (CTs, MRI, X-ray, I^{131} -cameras etc.) and certified (e.g. GMP) areas of IVF (In Vitro Fertilization).
- Installation of common or special laboratory benches and cabinets.
- Application of special materials and products (corian, inox, 3M Dinoc, HPL cubicles, scrub units etc.) in any kind of special constructions.
- Installation of any type of windows and doors e.g. hospital automatic sliding doors, lead-lined doors and frames, FRed doors, lead glass doors & windows, hermetically sealed openings.
- Project Management - supervision and implementation of Medical Equipment
- HVAC installations and special electromechanical applications with high - tech materials & products certified by JIS and CE such as laminar flow systems, closed control units, air handling units, geothermal pumps, solar thermal systems, VRV & VRF multi-split systems.
- Medical gas installations, OR control panels, pendants, bed head units (design, installation - testing, commissioning and certification of medical gas pipeline systems, maintenance, remote monitoring and management).

OT Specifications:

- ➔ Absolute flatness
- ➔ Vertical level adjustment of sub frame
- ➔ Hermetic sealing
- ➔ Sound insulation
- ➔ Non-flammable materials
- ➔ Ease of disassembly - individuality of panels
